~ Launch Codes ~

1. Open terminal and go into the route using:
`cd team_1__matthewc691_isabelz213_nataliek54_seanz22/app`
2. Run in the terminal:
`pip install -r requirements.txt`
3. Run the python file using:
`python __init__.py`
4. Open the link given after running `__init__.py`

PROJECT DESCRIPTION

NarraMaker is a collaborative story writing website that is free for all users. By making an account, you can read and write stories and add to others'. These stories are categorized by genre and accessible to other users on the Browse page. NarraMaker will track contributions by users and allow users to work together to craft narratives in an open, updated, and easy-to-understand environment.
